

LEGAL SUPPORT SYSTEM

The “legal support system” is a web accessible database and enquiry forum for advocates and their clients. Clients can enquire about their case using the enquiry form in the website. Administrator of this web site will contact the client and collect the details about client and the case. Admin manages advocate, client and case details. The website provides information for their clients and other Lawyers. The clients can go through the proceeding of their respective cases, using the username and password provided to them. The online facility is available to the clients only.

Existing System:

The existing system for the "Legal Support System" is a manual and paper-based process, lacking digitalization and automation. It primarily involves phone calls and physical meetings to gather and manage case details.

Proposed System:

The proposed system for the "Legal Support System" aims to digitize and automate the processes, improving efficiency and accessibility for all stakeholders.
